MÓVEO PRESENTS

AI42: enterprise AI under control

THE ENTERPRISE ARTIFICIAL INTELLIGENCE PLATFORM BY MÓVEO

ABOUT AI42

What is AI42?

móveo's enterprise AI platform

AI42 brings generative AI into business processes through a single governed environment — without compromising security, control or compliance.

AI42 MODULES

Chat, Mail and Analyze: faster everyday work

Chat

Conversation with configured LLMs, with context and access to authorized knowledge bases, for quicker answers.

Mail

AI helps you understand messages faster and draft replies sooner.

Analyze

Querying and comparing documents with answers anchored to their sources, so results are easier to check.

AI42 MODULES

Translate, Summarize and Meetings: content handled in minutes

Translate

Dedicated multilingual engine for text and documents, for consistent, faster translation.

Summarize

Turns long content into concise summaries, so you read less and act sooner.

Meetings

Transcription, speaker recognition and structured reports from audio recordings, ready to use.

BUILT-IN CONTROLS

Security by design

4 distinct roles

Role-based access

HMAC-signed audit logs

Tamper-evident

Separate domains

Admin, configuration and security

Designed to support GDPR and Swiss nLPD compliance; data residency and access controls help address CLOUD Act exposure.
